EDUCATION

University of Washington -Seattle

B.A. in Design Studies (Interaction Design focus)

Minor in Cultural Geography

AREAS OF EXPERTISE

Product strategy (B2B / B2B2C), Platform & systems design, Research-driven decision making, Cross-functional product collaboration, Design systems & scalable UX, End-to-end product design

TOOLS & TECHNOLOGY

Figma

Prototyping & design systems

AI-assisted workflows

OVERVIEW

Lead Product Designer with 10+ years of experience leading complex B2B and B2B2C products across e-commerce, fintech, and enterprise platforms. Known for translating ambiguous business problems into scalable design solutions that drive measurable outcomes, including revenue growth, operational efficiency, and customer adoption. Partner closely with Product, Engineering, and Research to define strategy, align stakeholders, and deliver high-impact work under real-world constraints. Experienced in platform design, design systems, and end-to-end product execution from early discovery through launch and iteration.

EXPERIENCE

Bolt

04/2022 - 06/2024

Senior Product Designer - E-commerce, B2B & Consumer Platforms

- Led design for merchant onboarding and installation experiences, reducing time-to-value from weeks to days by eliminating manual implementation workflows and redefining how merchants activated products at scale. Resulted in several hundred merchant sign-ups shortly after launch.
- Increased abandoned cart recovery rate from 6% to 13% (some up to 26%) and helped merchants recover over $18M in potentially lost revenue
- Partnered closely with Product and Engineering to define scope, prioritize tradeoffs, and deliver a net-new product in under 60 days as part of a company-wide initiative, balancing speed, quality, and long-term platform considerations.
- Contributed foundational components and interaction patterns to the design system supporting both merchant and shopper experiences, improving consistency across products and accelerating future feature development.
- Identified systemic UX friction in the merchant checkout configuration flow and influenced product strategy by shaping roadmap priorities and cross-team investment decisions.

Capital One

02/2019 - 11/2021

Principal Experience Designer - Commercial Banking Platforms

- Led design for a unified expense management platform serving commercial card administrators and cardholders, consolidating fragmented workflows and reducing manual processes across multiple products.
- Conducted and synthesized 50+ research sessions with finance teams and end users to uncover systemic pain points, directly informing product strategy, IA decisions, and prioritization for the next-generation Commercial Card Platform.
- Defined and implemented a mobile design system for commercial card applications across iOS and Android, enabling consistency across teams and accelerating delivery in a highly regulated environment.
- Established a global single sign-on vision and design strategy across commercial banking products, aligning security, compliance, and user experience requirements to support long-term platform scalability.
- Supported and mentored designers through critique, feedback, and cross-functional collaboration

C.H. Robinson

11/2017 - 02/2019

Lead UX Designer - Transportation & Logistics Platforms

- Led on-site research with enterprise users across industries to inform platform-level IA and workflow improvements for supply chain management tools.
- Partnered with Engineering to establish foundational design standards and reusable UI patterns, helping reduce front-end development time and improve consistency across Navisphere products.

Clockwork

10/2011 - 08/2017

Interactive Designer - Agency, Government, Non-Profit, Consumer, B2B, Retail

- Delivered digital products across government, non-profit, retail, and B2B clients, partnering closely with strategists, engineers, and stakeholders to reduce technical debt and improve long-term maintainability.
- Contributed to the redesign of public-sector platforms, including a fully WCAG 2.0–compliant intranet and public site for one of Minnesota's largest counties, significantly simplifying content and improving accessibility for residents.
